## DIESEL ELECTRIC SERVICES LEADS THE WAY ON THE NEW PWC HIGH RISE BUILDING

Diesel Electric Services is proud to be associated with the new Price Waterhouse Coopers Head Office currently being built in Waterfall City. Owned by Attacq and developed by Atterbury, this will be the first high rise within the booming precinct.

Claasen Auret is the appointed electrical consulting engineer and WBHO have been appointed as the main contractor for the implementation of this project.

Diesel Electric Services' scope of work included the installation of 2 x 2 200kVA generators with sound attenuation to ensure that maximum site noise levels are not exceeded. A 23 000 litre bulk diesel tank providing security and reliability of fuel to the site was also installed, providing reliable back up power to this critical site.

Diesel Electric Services interfaced with Malaysian Switchgear Distributors who supplied, installed and commissioned the associated medium voltage switchgear for this site. Diesel Electric Services continuously strives to live up to our motto "Dynamic Engineered Solutions" providing reliable and affordable back up power and reticulation to industry.
